POSITION

Senior Web Engineer

WORK EXPERIENCES

November 2017

Taught course: "Combining React and Websocket to build real time web applications: a case study"

Codemotion Milan 2017, Milan (Italy)

<https://goo.gl/EeQVKS>

This year I was speaker for Codemotion Milan 2017. Along with two colleagues of mine, we held a speech on real time web applications.

Here you can find the abstract:

Nowadays, applications need to be more and more dynamic, interactive and fast, so much so as to allow content and information to be updated in real time.

During this talk, we will see a real example of how to create such a production-ready application, based on a use-case answering this need for interactivity and usability, and using some of the most known technologies the market has to offer, such as React, Flux, WebSocket and MongoDB.

January 2017

present

Senior Web Engineer and Team Leader for Gucci

Sopra Steria, Assago, Milan (Italy)

www.gucci.com

I personally took charge of the project, dealing with international realities, overseeing the handover and analysing the pre-existing solution both architecturally and from a procedural point of view.

- Definition of software development processes.
- Definition and implementation of Continuous Integration through Jenkins, while complying with PCI.
- Training of both support and development teams.
- Managing and leading of an onshore team (3 people) and an offshore team (5 people) in India.
- Frontend code reviewing.

December 2016

February 2017

Taught course: "An introduction to Frontend for beginners"

Sopra Steria, Assago, Milan (Italy)

<https://github.com/marcomontalbano/an-introduction-to-frontend-for-beginners/tree/2016-edition>

I devised this course meant to be an introduction to frontend for backend developers in Sopra Steria. I taught this course to two classes of 15 people each.

This course is divided in 3 modules: Frontend Overview (HTML, CSS and Javascript basics), Make a Website (DOM Manipulation, jQuery and Twitter Bootstrap), Automation (Less, Node.js, NPM, Bower and Gruntjs), plus a bonus module "Hybris: the FE side".

April 2016

January 2017

Senior Web Engineer and Team Leader for Acea

Sopra Steria, Assago, Milan (Italy)

Acea · <https://www.acea.it/myacea/it/login>

Fiora · <https://self-service.fiora.it>

Publiacqua · <https://self-service.publiacqua.it>

Technical leader of the front-end team developing a new public services portal. This new site allows customers to manage their utility contracts (water, electricity and gas supplies). Customers can activate new services, pay bills and check their payment history.

Beside MyAcea, the main portal, we developed new specific themes for other sub-companies, making up a total of 5 new portals.

- Leader of a team of 3 developers.
- Working side by side with the SAP Hybris team.

- March 2016
April 2016
- ### Senior Front-End for Unieuro
- Sopra Steria, Assago, Milan (Italy)
www.unieuro.it
- Front-end architecture of the new e-commerce site. I developed a new way to use elements inside pages and how they interact, so as to reduce duplicated code and increase maintainability.
- Moreover, this is the first big project to use [jCreate](#) library.
<https://github.com/marcomontalbano/jquery-jcreate>
- October 2015
March 2016
- ### Senior Web Engineer and Team Leader for Moncler
- Sopra Steria, Assago, Milan (Italy)
[social intranet](#)
- Technical leading for the development of a Social Intranet using Bitrix24 and PHP.
- Leader of a team of 2 developers.
 - Direct communication with the client to take change of all new activities.
 - Widening of my knowledge of Social Intranet.
 - Integration with Warda DAM (Digital Asset Management).
- January 2015
July 2015
- ### Senior Front-End and Team Leader for Gucci
- Sopra Steria, Assago, Milan (Italy)
www.gucci.com
- Management of a developer team and customer relations. Architecture of front-end restyling of the pre-existing e-commerce site.
- Leader of a team of 2 developers.
 - Direct communication with the client to take change of all new activities.
- November 2014
